Open Source Solutions for Civic Tech

open{code}.md

Dignet Pro SRL, Chisinau, Republic of Moldova

Presentation - Mar 2024

1) Digital Public Goods (DPG)

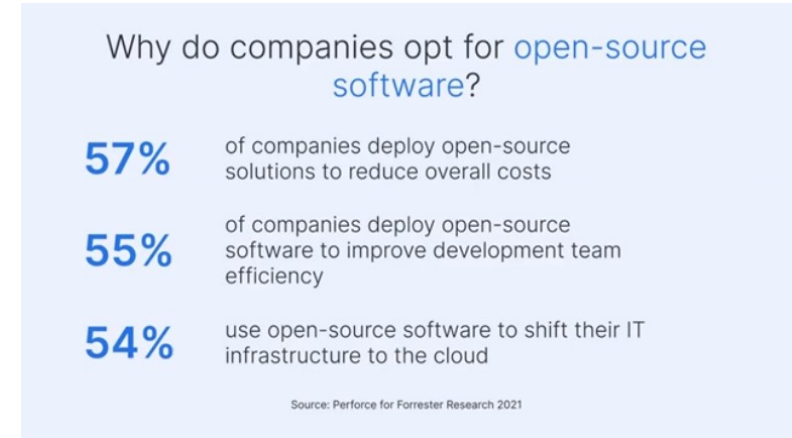

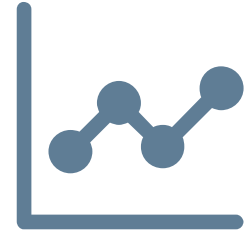

consist of 5 components:

- Open Source Software
- Open Data (structured data)
- Open Artificial Intelligence (AI) models
- Open Standards (including API)
- Open Content (text, formulas)

[*Moldova joins the Digital Public Goods Alliance*](#)

2) Open Source Solutions - Advantages

[Benefits of using Open Source](#)

3) Task

To promote Open Source Solutions for Moldova,
including Civic Tech (*Digital technologies in civil society*)

4) Goals of OpenCode.md

Creation of Open Source Community in Moldova
to promote Open Source Solutions, including Civic Tech

Digital technologies in Civic Tech and GovTech

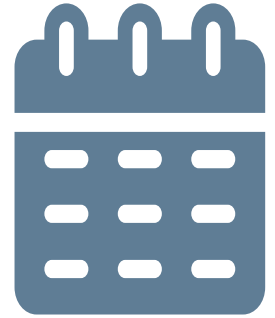

5) Civic Tech Capabilities

- Creates governmental transparency through the use of Open Data
- Simplify communication between citizens and government
- Communication between citizens and civil society

6) Civic Tech. Today's situation in Moldova

- Lack of Civic Tech solutions
- No Open Source Solutions for Civic Tech available

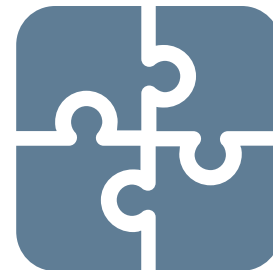

7) What we have already done

Registry of trustful Open Source Solutions

Software 130+, 21 sections

Supported in 3: Romanian, English and Russian

The screenshot shows the website's header with contact information (+373 62 104-710, opencode.md@gmail.com, My account) and navigation links (About, Software Registry, Search, Tasks Examples, Blog, Contacts). The main content area is titled "Registry of Open Source Software" and lists 21 topics in a grid:

- General Purpose
- Agriculture
- Public IT services
- Education
- Business finance
- Cybersecurity
- Linux
- Healthcare IT
- Municipal IT services
- Environment
- Personal finance
- IT Systems Monitoring
- DevOps
- Artificial Intelligence
- Civic technology
- Transport
- Open Banking
- Digital Privacy

8) Our achievements

News

Announced in June 2023, Moldova has now launched its [OpenCode.md platform](#). This initiative, spearheaded by the company Dignet, centres on open source solutions which aim to achieve "Digital Public Goods" classification. Furthermore, the platform provides access to open content collections and open data.

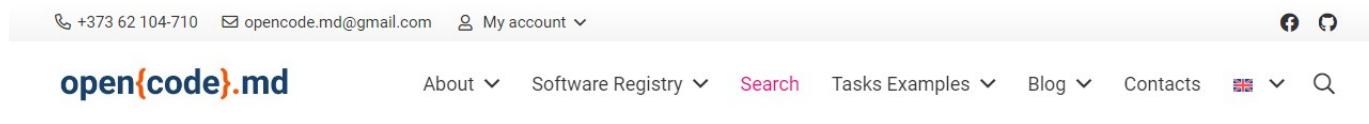

One of the criteria for software to be included is that it must be FOSS. The platform provides a [list of approved licences](#) which uses OSI-approved licences for software, Creative Commons licences for open content, and a selection of licences for open data. Solutions must additionally fulfil the following nine criteria:

- Relevance to advancing the Sustainable Development Goals (SDGs)
- Clear ownership

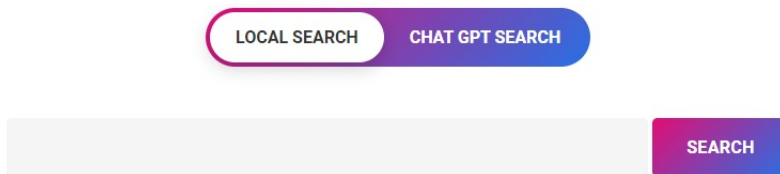

9) What we implemented recently

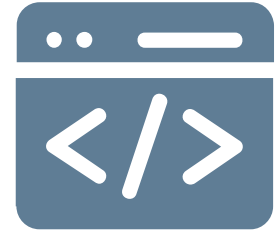

The section [Artificial Intelligence \(AI\) search](#) allowing search custom base solution, including for Civic Tech

Search of Open Source Solutions using Artificial Intelligence

10) Next steps

Development of Personal accounts for Community members:

- Business
- Individuals (*Experts, Volunteers*)
